

QUASIMEME

Quality assurance of information
for marine environmental monitoring

Certificate of Analysis

Ocean acidification

REFERENCE MATERIAL

AQ15 sample 24

Certificate of Analysis AQ15 24

General Information

In this report an overview is given of analytical data for this sample collected in our proficiency testing program. The consensus values are calculated using a robust statistical model. With this NDA model, the mean and standard deviation are calculated using all reported data when at least 4 results are left after removal of reported 'lower than' (<) and 0 (= zero) values. No outliers are removed.

This report is divided into two sections: Consensus Values and Indicative Values. The division is made on the reliability of the data. Consensus Values are based on at least 8 results and a maximum relative uncertainty of 6.25%. Indicative Values are based on a maximum relative uncertainty of 35% and a minimum of 4 and maximum of 7 results, or a relative uncertainty greater than 6.25% when there are at least 8 results.

For each determinand the following parameters are given: mean, standard deviation, coefficient of variation, number of results, median, MAD (Median of Absolute Deviation), the uncertainty of the mean (consensus or indicative) value and the relative uncertainty.

Sample information

QUASIMEME reference materials cover a range of natural SeaWater species from contaminated waters from the North Sea and/or Mediterranean.

This AQ15 sample 24 of Seawater spiked with DIC from unknown is prepared for the QUASIMEME proficiency programs. The results on which the values in this report are based were taken from the periods given in the following table.

| Year.Round | Program | Sample Round Id |
|------------|---------|-----------------|
| 2024.2 | AQ15 | QOA024SW |

Consensus Values AQ15

Method: Ocean acidification - AQ15

| Element | Unit | Mean | Std.Dev. | CV % | N | Median | MAD | Uncertainty | Rel.Uncert. % |
|----------------------------|---------|------|----------|------|----|--------|-------|-------------|---------------|
| pH | - | 8.23 | 0.081 | 1.0 | 10 | 8.23 | 0.059 | 0.032 | 0.391 |
| Dissolved Inorganic Carbon | μmol/kg | 1877 | 6.12 | 0.3 | 11 | 1877 | 3.82 | 2.31 | 0.123 |
| Total Alkalinity | μmol/kg | 2269 | 8.24 | 0.4 | 19 | 2268 | 4.12 | 2.36 | 0.104 |
